

# Environmental Consultancy

The **AquaBioTech Group** is an international consulting company strategically located in the centre of the Mediterranean on the island of Malta, although operating globally with clients and projects in over fifty-five countries.

The **AquaBioTech Group** undertakes a variety of aquaculture, fisheries, marine surveying, aquarium and aquatic environmental projects through its regional offices and partners throughout the world.

The **AquaBioTech Group** is a leading independent environmental consulting, technology, research and development company with a focus on environmental projects related to aquatic, marine and aquaculture as well as water and wastewater treatment. The company undertakes projects and provides consultancy services in the following areas: -

## **Waste Management**

Correct planning and implementation of a waste management strategy within industry has become essential for any business. Understanding the polluting levels of waste and defining the sources and quantities of waste (waste streams) is the first step towards minimising impacts on the environment and conforming to ever more stringent legislation.

## **Environmental Engineering**

In addition to offering full architectural planning for a variety of projects, our staff can provide commissioning and servicing of water and wastewater treatment equipment as well as the design, specification and supply of water treatment plant for the industrial and agricultural sectors. The company also provides environment consultancy services in the fields of groundwater resource assessment and remediation, and water re-use initiatives.

## **Water Treatment**

Water treatment has become an integral part of any commercial and industrial process. In most cases, the quality of the final product is dependent on the quality of the water used in the production process. Stringent regulations and directives on the quality of water for human consumption and on the disposal of (waste) water have made the proper treatment of water and wastewater a priority for private and public consumers. With years of experience in this field, the **AquaBioTech Group** engineers provides clients with water treatment solutions to meet specific requirements.

## **Environmental Impact Assessments (EIA)**

The company undertakes a variety of hydrological, geological, bathymetric and aquatic ecological studies for both freshwater and marine environment along with waste management plans as part of any Terms of Reference for Environmental Impact Assessments (EIA) or planning statements.

## **Auditing**

Consultancy services for companies seeking to obtain ISO 14001 certification or undertake a variety of audits ranging from simple waste management and EMS audits, through to full ISO 14015 audits.
