ABT Arabia is a joint venture between the **AquaBioTech Group** and the **Arab Fisheries Company** designed to offer consulting, development and management services to clients who have projects located in any Arab League member country. **ABT Arabia** is strategically located in Jeddah, Saudi Arabia.

All of the company's work is in some way related with the marine or aquatic environment, although varying from aquaculture developments, market research / market intelligence, through to project feasibility assessments, finance acquisition, project / operations management and technology sourcing / transfers.

Staff and Personnel - The core of the company

ABT Arabia is able to draw upon the combined human resources of both the **AquaBioTech Group** and the **Arab Fisheries Company**, thus accessing over thirty-five full and part time personnel, all of whom are considered leaders in their respective fields of expertise. In addition to this, the company also has a comprehensive database of over fifty specialists who are able to assist in specific studies, projects or research.

Site Assessments - Feasibility Studies and Diagnostic Audits

For new developments **ABT Arabia** can undertake a complete assessment for projects, including site selection, financial planning and reviews and technical / non-technical surveys.

For existing developments, **ABT Arabia** undertakes complete technical assessments and trouble shooting for both hatchery, on-growing and processing operations, developing detailed proposals for mitigation. The **AquaBioTech Group** also advises on regulatory control, infrastructure requirements, environmental issues and other matters ensuring sustainable development.

Specialist Audits - Due Diligence / Insurance Assessments

ABT Arabia can also be called upon to undertake a variety of specialist assessments and audits for entities such as insurance companies and feed manufacturers, as well as banking / financial institutions and private / corporate investors.

Providing **EXCELLENCE** through **INNOVATION** and **QUALITY**

Aquaculture Development

ABT Arabia undertakes aquaculture designs and developments from their initial inception and planning stages through to the commencement of operations. Ensuring complete client confidentiality, the company is capable of undertaking entire projects in-house where our biologists, engineers, architects and other technical staff are experienced in working on a variety of projects. Specialist staffs are experienced in the following fields:-

Cage Aquaculture

Experienced in designing aquaculture projects for a variety of near-shore and offshore sites working with major cage manufacturers and our own naval architect. Finding the ideal site location is essential in modern aquaculture, thus reducing environmental impacts and improving production quality.

Shrimp farming

Large-scale extensive, semi-intensive and intensive shrimp farming operations can be designed by our team of experienced staff. Knowledgeable in various aspects of shrimp farming, the company also offers technical assistance to existing farms in areas such as broodstock domestication, maturation, hatchery production and harvesting / processing as well as management issues such as hygiene and biosecurity protocols.

Hatcheries

The design and commissioning of hatcheries for fish or shrimp, including training at **ABT Innovia** can be undertaken for a variety of fish and shrimp species. **ABT Arabia** also has a turnkey hatchery package offering a highly cost-effective production solution for new developments.

Recirculation systems

ABT Arabia also has its own recirculation system designed specifically for the North African & Middle East climates & species.

Environmental Impact Assessment

ABT Arabia offers a dedicated professional team able to tackle all levels of assessments ranging from brief environmental Statements to full Environmental Impact Assessments (EIA) for a variety of developments and in full compliance with government / local authority requirements.

QUALITY *is the customer coming back - not just the* **SERVICE**
