Immediate Vacancy

Marine / Fisheries Technician

AquaBioTech Group is seeking a suitably qualified person to work as a **Marine / Fisheries Technician** supporting both the **ABT Marine** and **ABT Fisheries** divisions of the company, in a diverse variety of projects relating to marine, fisheries and aquaculture projects.

Synopsis of position offered

A position within **AquaBioTech Group** has arisen for a suitably qualified person to join the team as a Marine / Fisheries Technician working on a variety of local and international projects. The responsibilities of the successful candidate include but are not limited to:

- Developing an effective and professional working relationship with ABT Marine and ABT Fisheries colleagues and be prepared to work as a team and/or individually lead marine / fisheries projects and surveys.
- Mobilising, executing and demobilising of all project surveys, including data collection, analysis and reporting.
- Assisting in developing detailed technical proposals and quotations for EU and nationally funded research projects, international tenders and private clients.
- Being involved in office work consisting of literature review, data analysis, report writing, equipment documentation and equipment maintenance.
- Building and maintaining the ABT Marine departments capabilities and infrastructure, which includes a small survey vessel, ROV and various surveying equipment.
- Work with the business development department to promote the activities of the ABT Marine and ABT Fisheries divisions.
- Being involved in a variety of other projects and assignments relating to marine, fisheries and aquaculture.

Working in conjunction with colleagues from ABT Marine and ABT Fisheries, as well as other departments, the position requires a person who is highly motivated, methodical and organised. The selected person must be prepared to work long survey hours when required and keep to very tight deadlines in isolated and multi-functional projects in conjunction with a team of international staff based at our head-office based in Malta.

Qualifications Overview

The successful candidate will have a good solid background in Marine / Fisheries, and or Aquaculture sciences, with at least a BSc in the aforementioned fields, and ideally a MSc level of education.

He/she will also be required to be fluent in spoken and written English and have a good solid background in Aquatic System Sciences and/or other related marine / fisheries sciences.

The successful candidate will ideally be a holder of PADI advanced open water certification or equivalent.

The successful candidate should also be able to demonstrate having fieldwork experience in marine environmental projects, such as sediment sampling and analysis, water sampling and benthic habitat classification.

Financial Package

The successful candidate will be offered a long-term, fixed-term contract with the company. The starting package offered for this position will be structured largely upon the chosen candidate, reflecting the experience the candidate brings to the company, but also in line with the cost of living in Malta.

Application Procedure

Further information about **AquaBioTech Group** and the services we offer can be viewed at www.aquabt.com. Applicants are required to submit a full *Curriculum vitae* in **AquaBioTech Group** Europass format that **must** be downloaded from our website – **no other Cv formats will be accepted.**

Questions about the application should be directed to the HR Department, on hr@aquabt.com
